

30 Nov–1 Dec 2017 | ROVANIEMI

FERA Conference on Education 2017

19. Perhetutkimus/Family research

chair Satu Perälä-Littunen, University of Jyväskylä

We call for presentations focussing on family, parenthood or childhood. Your presentation can deal with changes in upbringing; family as relationships between parents and their children, siblings or spouses; parents' and children's participation in various educational institutions, including home-school cooperation; interculturalism in family life; and family – work interface. We are interested in temporality in family life: historical research, research dealing with the present or the future are welcome. Topics where families are focused fit also the scope of this thematic group.
