Promotion of
global
responsibility

“Finnish higher education institutions utilise their research and expertise to solve global problems and to consolidate competence in developing countries. The activities of higher education institutions are ethically sustainable and support students’ prerequisites to function in a global environment as well as to understand the global effects of their activities.”

Finland Development Policy Programme

- Finland's development policy and development cooperation are based on human rights. The priority areas are
 - 1) a democratic and accountable society that promotes human rights,
 - 2) an inclusive green economy that promotes employment,
 - 3) sustainable management of natural resources and environmental protection, and
 - 4) human development.
- Three cross-cutting objectives define activities: gender equality, reduction of inequality and climate sustainability.
